Mahdi Sepaseh

Senior Frontend Engineer

React | TypeScript | Frontend Architecture

Mashhad, Iran m.sepaseh@gmail.com linkedin.com/in/sepaseh github.com/sepaseh

I am a Senior Frontend Engineer with 17+ years of experience developing web products, from commercial websites to enterprise platforms. My primary expertise is in React, TypeScript and frontend architecture. Alongside development, I have contributed to business requirements analysis, solution design and technical team leadership.

Professional Experience

Senior Software Engineer

BitWatt | Jul 2024 – Apr 2026

- Built React and TypeScript developer workflows for wallet-based authentication, application management, team collaboration, and API key management.
- Implemented schema-driven interfaces for transaction automation, enabling new workflows to be configured through metadata without frontend code changes.
- Contributed to system analysis and technical planning across the ecosystem; developed the frontend of an AI-assisted physiotherapy platform.

Technical Lead

Veerasense | Aug 2023 – Jul 2024

- Led React and TypeScript frontend development for AI-powered industrial monitoring, safety, and inspection software, collaborating with AI and backend engineers.
- Analyzed enterprise customer workflows and contributed to software architecture and technical implementation plans.
- Supported customer deployments and user training; provided post-deployment technical support.

Technical Lead

Hoomaan | Dec 2022 – May 2023

- Established shared frontend architecture, project organization, and implementation practices across products using React and Next.js.
- Led frontend development for a multi-branch supermarket platform supporting location-aware ordering, distributed inventory, and retail operations.
- Coordinated the development team and worked with backend engineers on API design and service integration.

Co-Founder / Software Engineer

SP Soft (Software Solutions Provider) | May 2018 – Dec 2022

- Co-founded a software development company delivering enterprise software solutions across healthcare, hospitality, tourism, education, finance, and business management.
- Led customer discovery, technical feasibility assessment, frontend architecture, and application development with React and Redux.
- Worked with backend engineers on API design and system integration; supported deployment and continued product development after delivery.

Senior Web Developer

Profile Digital | Jul 2015 – May 2018

- Developed reusable frontend components and API-driven applications with AngularJS and JavaScript for a professional networking and digital identity platform.
- Combined server-rendered public profiles with client-side interactions and delivered Google AMP pages for mobile search visibility.
- Contributed to the transition from CMS-based applications to SPA architecture and shared frontend infrastructure.

Web Developer

Commercial Trade Promotion | Oct 2011 – May 2015

- Developed custom websites for commercial and industrial organizations, working directly with customers on requirements and delivery.
- Designed and implemented custom WordPress themes tailored to customer branding and business requirements.
- Built SEO-oriented websites while collaborating directly with customers to deliver search-friendly digital solutions.

Junior Web Developer

Kaspid | Nov 2008 – Mar 2011

- Developed frontend templates and integrated them into CMS-based websites for commercial customers within a development team.
- Contributed to SEO-oriented website development, production deployments, and customer delivery.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3

State Management: React Query, Redux, Context API

UI & Styling: Tailwind CSS, shadcn/ui, Styled Components, Sass, Ant Design, Material UI

Development Tools: Vite, ESLint, Prettier, Git, GitHub Actions

Testing: Vitest, React Testing Library, Playwright; unit, integration and end-to-end testing

Architecture & Performance: Frontend Architecture, Design Systems, Web Performance Optimization, Core Web Vitals

Soft Skills

Problem Solving · Systems Thinking · Technical Communication · Cross-Functional Collaboration · Ownership · Technical Leadership · Mentoring

Selected Projects

Multi-Signature Crypto Wallet Ecosystem | BitWatt | 2024–2026

Designed and implemented custom browser extension architecture with React, TypeScript, and Rollup; built a multi-entry build pipeline and asynchronous messaging between isolated extension contexts.

Digital Pathology Education & Interactive Examination Platform | SP Soft | 2018–2022

Developed the React and Redux frontend with progressive, multi-resolution rendering for multi-gigabyte slides; synchronized educational annotations and examinations with image navigation.

Hospitality Guest Experience & IPTV Platform | SP Soft | 2018–2022

Built a shared JavaScript frontend for Android TV, webOS, Tizen, and Linux/Android set-top boxes; isolated device-specific key mappings to support remote-control navigation without separate codebases.

Professional Digital Identity & Networking Platform | Profile Digital | 2015–2018

Built reusable AngularJS components and a role-aware profile interface for individuals and organizations; developed a Cordova mobile application from the shared web codebase.

Education

Bachelor's in Computer Software Engineering Technology | Shandiz Institute | 2016–2018

Associate Degree in Computer Software | Khorasan Institute of Higher Education | 2012–2015

English Language Course | Jihad Daneshgahi Education Center | 2012–2015

Languages

Persian: Native, **English:** Professional Working Proficiency
